

Lockstraps: The Locking ATV/MC Tie Down

September 30, 2010 by [Seth Fargher](#)

PROTECT YOUR STUFF
With the only tie-down strap that keeps your valuables safe

- 2 Combo Locking Carabiners
- Steel Cable Inside Strap
- Soft Tie Extensions

Strap it. Lock it. Secure it. = Peace of mind.

The new locking tie down system complete with a stainless steel cable running the length of the strap is the first of its kind. No more weaving cables or chains through the subframe of your machine or extra keys to add to your key ring. The built-in combination lock on both carabeaners allows you to set your own combination and walk away with the peace of mind that your toys are secure.

Lockstraps LLC was forged in 2009, shortly after the president of the company, Jeff Cranny, had the misfortune of having motorcycles stolen from his truck. He realized the importance of being able to secure his truck bed cargo from potential thieves. It prompted him to find a dependable device to secure his valuables. Jeff's idea was to produce a heavy duty tie down with a combination lock. Having developed the patent pending Lockstraps, Jeff's current vision is to put smiles on the faces of Lockstraps' customers by stopping thieves in their tracks.

Lockstraps protect the honest, and disable the dishonest. In 2009 the FBI reported 1.5 million bicycles stolen in the United States. Police say that 90% of theft is "see it, grab it, and run." If valuables appear difficult to steal, thieves will most likely move on to an easier target.

Lockstraps are well constructed. Because of the carabineers, Lockstraps will never pop off like typical straps with "S" hooks. They are built with an eight-bound stainless steel cable sandwiched between double nylon webbing. Tough rivets keep dual combination carabineer locks in place at both ends of the Lockstraps. The owner may change the combination with each use if so desired and may set different combinations on either carabineer. Lockstraps also incorporated a soft tie-extension so no scratching occurs. A lot of thought and effort was put into creating the best most affordable tie-down strap on the market. The Lockstraps locking tie downs provide piece of mind, security, and unmatched quality. Lockstraps are 8.5 feet long, 1.5 inches wide, 1/4 inch thick, and weigh 2 pounds each. They come backed with a 100% satisfaction guarantee and a 120 day parts and labor warranty. Now you can secure motorcycles, ATV's, tools, equipment, bicycles, etc. in less than a minute. Each strap is sold individually with a retail price of \$39.95 – \$44.95. Lockstraps can be found throughout an extensive dealer network throughout the states and on line at www.lockstraps.com throughout the states and on line at: www.Lockstraps.com
