## MXA'S 2012 MOST INNOVATIVE IDEAS

R&D Racing is working on a prototype throttle body that replaces the butterfly with a better flowing cam design.

There are many types of folding levers, but only the Renthal Intellilever folds in, out, up, down and sideways.

Have you ever sat in a restaurant after a race and wondered if your bike was safe? Lockstraps provide peace of mind.

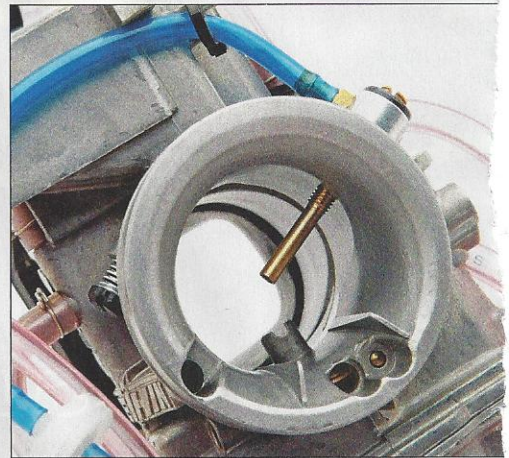

Back in the 1970's every racer ran air forks. Showa is bringing them back.

Why use tools to adjust your KTM 250/300 power valve when you can just twist the Krefit Moto adjuster?

The 2012 KX450F's quick change maps and Launch Control are awesome.

Dick's Racing can supercharge any two-stroke carb with its dual-fuel mod.
